Reprogramming Request

Installation: F.E. Warren AFB, WY

Project: GBSD Integrated Command Center

Authorization: National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2023, P.L. 117-263

Estimated Cost (\$000):

Previously Appropriated	122,000
Previously Reprogrammed	5,900 <sup>1/</sup>
Requested Reprogramming	12,383
Total Estimated Cost	140,283

<sup>1/</sup> Below Threshold Reprogramming

Project Description: This project will construct a multi-story Integrated Command Center for the new Sentinel (Ground Based Strategic Deterrent (GBSD)) Intercontinental Ballistic Missile mission at F.E. Warren Air Force Base. The facility will meet Intelligence Community technical standards and will include mitigation measures for direct hostile threats, emergency power, High-altitude Electromagnetic Pulse, and Chemical, Biological, Radiological protection measures. This project was awarded on January 25, 2024.

Justification: The cost increase is due to a combination of refined design requirements and mission-critical, user-requested changes for High-Altitude Electromagnetic Pulse and Tempest protections. The time impacts resulting from these changes are significant for the prime contractor and all subcontractors. Delays against the approved construction schedule necessitate costly adjustments, such as schedule acceleration, which involves overtime labor and expedited material procurement to meet deadlines. Furthermore, these design changes can lead to work stoppages and the need for rework of previously completed tasks, causing ripple-effect disruptions that decrease overall productivity and extend project management and overhead costs for all parties involved.

A 10 U.S.C. §2853 cost variation notification dated January 29, 2026, was submitted to the congressional committees.

Source of Funds: Savings from the following projects will fund this requirement:
